POLICY

It is the intent of the Superior-Greenstone District School Board to make available to the community, the School Board's buildings, facilities, and grounds provided such use does not conflict with school programs and associated expenses are reasonable.

The Board's primary obligation is to the pupils of the Superior-Greenstone District School Board, hence in the event of possible conflicts with use, the policy of the Board will be to provide facilities for pupils before non-school groups. The principal will attempt to schedule events as to avoid conflicts with usage.

For members of the community who wish to engage in the Facility Partnerships Program (Joint Facilities Agreement) or Community Use of Schools Program (before and after school hours) the board will provide fair and equitable access to available facilities and grounds.

The Board will recover costs incurred by these programs and in due regard enforce its rules and regulations as outlined in the Board's Policies and Management Guidelines.
