Northern Ontario Information Technology Educational Leaders Technology Conference 2007

Press Release—April 25th, 2007

For Immediate Release
April 25, 2007

Marathon, Ontario — The Northern Ontario Information Technology Educational Leaders, NOITEL, is pleased to announce their second technology conference. NOITEL is comprised of the Information Technology Managers for the school boards in Northern Ontario including Lakehead Public Schools, Northwest Catholic District School Board (DSB), Rainy River DSB, Northern School Resource Alliance, Kenora Catholic DSB, Thunder Bay Catholic DSB, Superior-Greenstone DSB, Superior North Catholic DSB, Keewatin Patricia DSB and Conseil scolaire de district catholique des Aurores boréales.

The event will take place at the Valhalla Inn in Thunder Bay on June 28 and 29. Last year, 97% of the Information Technology Technicians from all the school boards in Northern Ontario attended and the same is expected this year. This conference provides technicians an opportunity for professional development; the chance to share best practices, to network and discuss their IT solutions in the education sector.

Last year speakers from Microsoft, Novell, Apple and Cisco were featured presenters. This year's final agenda is expected to have a similar presenter's field. As well, Board Technicians themselves facilitate sessions where they compare their solutions for implementing various technologies to address common education related issues.

-more-

Expenses for the conference are covered by sponsoring vendors and manufacturers. These groups support information technology in education in many ways and realize that keeping technicians abreast of the technological changes is key to the successful implementation and efficiency of school IT systems. We thank these organizations for their collaboration as it makes it possible to have this conference. This year's premium sponsors are Wilson's Business Solutions partnered with Acer, Telus partnered with Polycom, Video Conference Solution partnered with Sony and Codian, IBM/Lenova, Dell Canada and CDW.
