

Small Schools Make a Difference

May 14, 2025

Dear Parents, Caregivers, and Guardians,

Subject: Update on Water Quality Testing at B.A. Parker Public School and Geraldton Composite High School

We are writing to provide an important update regarding the recent water quality concerns at B.A. Parker Public School and Geraldton Composite High School.

As previously communicated, discoloured water was observed on April 30, and out of an abundance of caution, drinking water services were temporarily discontinued while comprehensive testing was conducted. During this time, potable water has been made available to all students and staff, and all other water systems within the schools have remained fully operational.

We are pleased to report that **testing is now complete, and the results confirm that the water is safe for consumption.**

In addition, the source of the issue has been identified within a specific and isolated location at B.A. Parker Public School. Repairs are currently underway to fully address and resolve the concern. We will continue to monitor the situation closely to ensure the safety and well-being of all students and staff.

Thank you for your continued understanding and cooperation. If you have any questions or require additional information, please do not hesitate to contact your school's administration.

Sincerely,

Heidi Cloutier, Principal
B.A. Parker Public School

Andy McFarlane, Principal and Deidra Gerrard, Vice-Principal
Geraldton Composite High School
