

What is E-Learning?

E-Learning is taking an Ontario credit over the Internet. Students study in a virtual classroom during hours that are convenient to them. E-Learning is a great opportunity for students within

Superior-Greenstone District School Board to study a wide of variety of credits in a flexible way.

E-Learning courses are similar to traditional classroom courses, except that communication with the teacher and fellow students occurs in a safe, on-line website. Students and teachers do not have traditional face-to-face contact. However, great support is provided to all E-students because our E-teachers want their students to be successful!

E-Learning courses are not independent learning courses. Students are expected to communicate frequently with their teacher and may be required to work in collaboration with fellow classmates using tools that facilitate this collaborative effort in a virtual classroom.
