Steps to add SGDSB Wireless to Android Devices

To simplify setup, you can install the Domain Certificate here.

- 1. On main screen, swipe down options menu
- 2. Select Settings, or settings gear (as on right)

3. Ensure Wi-fi is turned on, then click on it.

4. Find "SGDSBStaff" and click on it.

If you cannot find it:

- a. Ensure you are near an access point
- b. Go to "Add Wi-Fi Network" at the bottom.
- c. Enter "SGDSBStaff" for Network SSID (Letter are case sensitive)
- d. Enter 802.1x EAP for security and enter settings as below
- 5. Settings should be as follows:
 - a. EAP Method: PEAP
 - b. Phase 2 authentication: MSCHAPV2
 - c. CA certificate: (unspecified)
 - d. User certificate: (unspecified)
 - e. Identity: you board username to log into computers
 - f. Anonymous identity: (leave blank)
 - g. Password: The password for your board account
 - h. Click Connect
- 6. You should now be connected to the "SGDSBStaff" network
- 7. Open your web browser and login to the Wireless Portal to enable internet access.

If you are having issues, please refer to the troubleshooting guide
